The Essentials Range of HDMI Senders

The Essential range of HDMI senders aims to offer a number of solutions for sending HDMI source signals throughout the home and office. Predominately targeting the application for sending the HDMI output of a CCTV system to a monitor, the range also offers versatility for other HDMI sources that are positioned remotely from the intended display monitor.

The range features wireless and wired options, and in addition features the function KVM (Keyboard, Video and Mouse) on selected models, enabling a user to control menus and settings from the source device.

The compact wireless senders offer a smooth transmission of up to 100-meters (open field range) for quick and simple set-up, whilst the wired version utilizes network cable to support up to 120-meter transmission distance.
